Informazioni generali

RAZIONALE

Il XIV Congresso SINDEM vuole essere il momento in cui si possa fare il punto dopo anni di esperienza clinica e di ricerca clinica e di laboratorio su molti temi che caratterizzano la complessità inerente i processi neurodegenerativi. Ai partecipanti verrà data la possibilità di discutere non solo le evidenze scientifiche ma soprattutto le controversie, del mondo clinico e scientifico, relative alle basi biologiche, la diagnosi e terapia, e i profili neuro-cognitivi delle malattie neurodegenerative. Esperti Italiani di fama internazionale presenteranno le varie problematiche dandone letture personalizzate alla luce delle evidenze scientifiche. Le letture saranno affiancate da presentazioni di lavori originali e da relazioni su temi emergenti che sono e saranno all'ordine del giorno in un futuro ormai prossimo. Il XIV Congresso SINDEM sarà anche una occasione per ricercatori clinici e di base per trovare un adeguato luogo di discussione dei risultati della ricerca scientifica sulle malattie neurodegenerative ed in particolare sulle demenze. Da ultimo, ma non per importanza, il Congresso offrirà l'opportunità di stimolare nuove e vecchie sinergie fra le iniziative di attività scientifica del nostro Paese.
